ReQlogic

ReQlogic is a powerful web-based eProcurement tool that directly integrates with PAVIR's accounting software, thus creating efficiencies and cost controls. It is an easy to use software mechanism, but it requires that we set up new users. Typically, medium- and large-sized laboratories have one or more users signed up. For those who order very few materials and services through PAVIR it may be easier to use the traditional paper requisition mechanism.

See here for instructions on how to submit a requestion through ReQlogic.

If you are interested in learning more about ReQlogic, please contact us at purchasing@pavir.org.
